Invoicing and debtor module

Get paid for regular bookings and chase late payments quickly and easily

The invoicing and debtor module from Cascade3d enables you to issue invoices and reminders for large and regular bookings at the touch of a button.

The module is part of our powerful analytics platform that uses data from your Leisure Management System to keep you in control. Featuring live updates, personalised reports and long term trend analysis, the system is designed to be used by everyone from reception to the senior team.
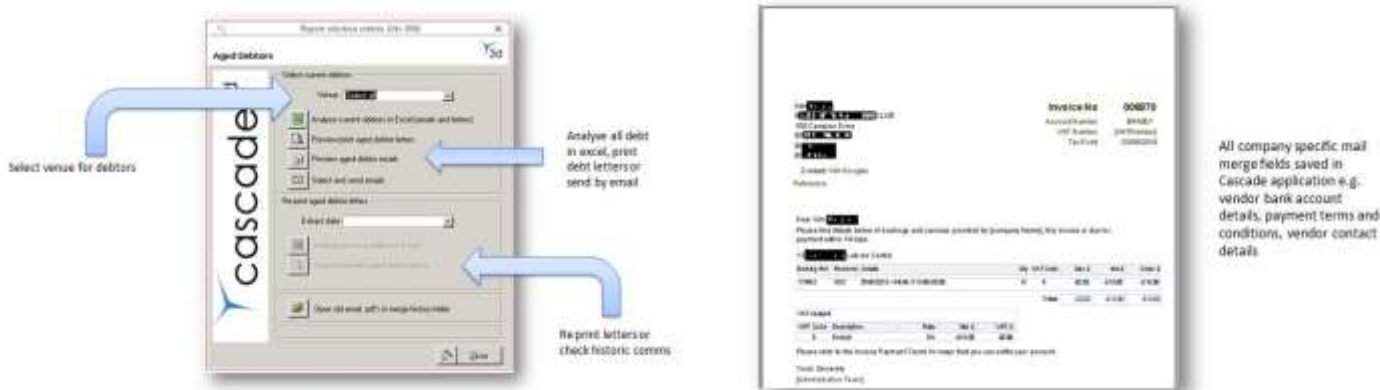

How does the module work?

Manually calculating and sending out invoices and keeping on top of old debt can be time consuming and laborious. If you need to issue invoices for large and regular bookings, the new invoicing and debtor module from Cascade3d will save you time and effort. And, if you choose the email option, it saves on printer ink, paper and postage too.

It's easy to set up and even easier to use, you just need to **Select-Analyse-Check-Send**:

- Create a standard template for invoices and reminder letters

- **Select** customers from your database choosing the appropriate date range (either from a single facility or multiple sites)

- Export into an Excel pivot table to **analyse** the results

- **Check** which invoices you want to send and run a test if required

- Choose whether to mail merge into Microsoft Word ready to print/post or **send** as an email with a PDF attachment

The system stores results so you can always check the invoices you've created and your merge history – invaluable if you are working as part of a team.

Aged debt made easy

With overdue invoices you use the same **Select-Analyse-Check-Send** process and you can create different templates depending on the age of the debt (for example, 30, 60 and 90 days).

Call Will Jones on 07808 789155 or email willjones@cascade3d.com to arrange a demo.

Cascade3d is an IoT and data analytics company based in The Cotswolds, providing database-driven solutions for businesses in the UK, Australia and India.

Cascade3d has been at the forefront of IoT technology, performance management and data analytics for over 15 years. We've helped hundreds of organisations to monitor, manage and process their data safely and securely.

Invoicing and debtor management is not just a one off activity, it's an ongoing process and you need a supplier you can trust.
